Djaouad Frih

AI-powered full-stack engineering that moves from demo to revenue

PROFILE

Engineering graduate from ESI SBA focused on one thing: turning AI capability into measurable business outcomes. I design, build, and deploy production-grade AI products — LLM integrations, RAG pipelines, and the web and mobile apps around them — taking each project end-to-end from database design to deployment. Every system I ship is built to drive efficiency, capture revenue, and serve real users in production, not just in demos.

EXPERIENCE

● IT Intern2024

Algérie Télécom — Sidi Bel-Abbès

- Shipped and maintained internal web applications used daily by the enterprise
- Operated production-grade systems and databases under real traffic
- Delivered in agile teams, owning tasks end-to-end from breakdown to rollout

PROJECTS

AI Virtual Receptionist

Next.js · NestJS · pgvector · React Native · Socket.io · Gemini

A 24/7 AI receptionist that ensures no inbound lead is ever missed — books appointments, captures and qualifies leads, routes conversations to the right department, and hands off to humans with AI-drafted replies. Real-time streaming chat, RAG knowledge base, native Android app, and embeddable widget. Deployed to production.

chat.djaouad.techGitHub

Smart PDF Workspace

Next.js · NestJS · pgvector · Gemini · WebSocket

Turns static documents into a working knowledge base: upload PDFs, auto-extract text, chunk and embed into pgvector, then ask natural-language questions grounded in your own files — no more hunting through folders. Team management, publishable embeddable widget, and real-time analytics dashboard.

docs.djaouad.techGitHub

AI Customer Support Agent

Next.js · NestJS · LangGraph · pgvector · OpenAI · TypeScript

Automates the repetitive layer of customer support so the human team focuses on what matters: answers common questions from a RAG knowledge base, checks orders, creates tickets, and escalates to humans only when genuinely needed. Includes admin dashboard and embeddable widget, live in production.

customer.djaouad.techGitHub

Developer Portfolio

Next.js · Tailwind CSS · Framer Motion · Netlify

High-conversion portfolio engineered for client acquisition — direct booking via Calendly, social-proof metrics, urgency-driven CTAs, and a live AI chatbot demo embedded directly on the page.

EDUCATION

● Engineering Degree in Computer Science2023 — 2026

École Supérieure en Informatique (ESI SBA)

State engineering diploma with specialization in software development and AI.

- **Master's Degree in Computer Science**

2026

École Supérieure en Informatique (ESI SBA)

Advanced coursework in AI, software engineering, and distributed systems.
