Djaouad Frih

Full-Stack AI Engineer

Summary

Full-stack AI engineer building production LLM systems: retrieval-augmented generation, agentic workflows with tool calling, and the web and mobile products around them. Two years of independent delivery — architecture, backend, frontend, deployment, and operations — with four AI products live and fixed-scope client work shipped for UK and Cyprus clients. Comfortable owning a system end to end or joining a team and shipping inside it.

Experience

2024–Present **Full-Stack AI Engineer**, *Freelance*, Remote

- Designed, built, and operate four production AI products solo: AI virtual receptionist (RAG with citations, booking, lead capture), AI support agent (LangGraph, tool calling, escalation), multi-tenant PDF workspace with page-level citations, and an MCP hiring server.
- Own the full stack: Next.js and NestJS services, PostgreSQL + pgvector retrieval, hybrid search, streaming over WebSockets, React Native clients, Docker and CI/CD.
- Delivered fixed-scope client builds on schedule: business website in two weeks (UK) and a complete full-stack build (Cyprus).

2024 **IT Intern**, *Algérie Télécom*, Sidi Bel Abbès, Algeria

- Shipped and maintained internal web applications used daily across the enterprise.
- Operated production systems and databases under real traffic, owning tasks from breakdown to rollout.

Selected Projects — live in production

AI Virtual Receptionist 24/7 receptionist answering from business documents with citations, appointment booking, lead capture, department routing, and human handover. Web dashboard, native Android app, embeddable widget. chat.djaouad.is-a.dev

Smart PDF Workspace Multi-tenant RAG assistant over PDFs and scans with page-level source citations, semantic search, and document-grounded answers. docs.djaouad.is-a.dev

AI Support Agent Tier-1/2 automated support with multi-turn memory, tool calling (tickets, order status, FAQ), RAG knowledge base, and human escalation. customer.djaouad.is-a.dev

HireMe MCP Server Open Model Context Protocol server exposing profile, projects, and a project-brief intake so AI agents can vet and scope work. mcp.djaouad.is-a.dev

Technical Skills

AI / LLM OpenAI, Gemini, LangGraph, tool calling, structured outputs, streaming, evaluation, prompt engineering

RAG & Retrieval PostgreSQL + pgvector, embeddings, semantic chunking, hybrid retrieval, cited generation

Full-Stack TypeScript, Next.js, React, NestJS, Node.js, Python, REST, WebSockets, React Native (Expo)

Infra Docker, GitHub Actions, Vercel, Render, PostgreSQL, MCP

Education

2021–2026 **Dual Degree, Engineering + Master's in Computer Science**, *Higher School of Computer Science (ESI SBA)*, Sidi Bel Abbès, Algeria

Intelligent Systems (ISI) — five-year program; algorithms, data structures, machine learning, software architecture.
